DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to methods of treating or preventing an inflammatory disease or disorder or treating or preventing inflammation, comprising administering to an animal a protein of SEQ ID NO: 2, classified in class 514, subclass 2.
 - II. Claims 15-25, drawn to a method of treating or preventing an autoimmune disease or disorder, comprising administering to an animal a protein of SEQ ID NO: 2, classified in class 514, subclass 2.
 - III. Claims 26-30, drawn to a method of treating or preventing graft vs. host disease (GVHD), comprising administering to an animal a protein of SEQ ID NO: 2, classified in class 514, subclass 2.
 - IV. Claims 31-35, drawn to a method of treating or preventing allergy or asthma, comprising administering to an animal a protein of SEQ ID NO: 2, classified in class 514, subclass 2.
 - V. Claims 36-48, drawn to nucleic acid molecules encoding polypeptides of SEQ ID NO: 2 or fusion proteins thereof, vectors, host cells and method of recombinantly producing protein, classified in class 536, subclass 23.5, class 435, subclasses 320.1, 252.3 and 69.1, for example.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions V is related to each of inventions I-IV in that the nucleic acids encode the

Art Unit: 1646

polypeptide, which is used in the methods of treatment of inventions I-IV. They are distinct inventions because the nucleic acids can be used in a method other than producing the polypeptide, such as in a method of hybridization.

Inventions I-IV are related to each other in that the inventions are all methods of treatment with the polypeptide of SEQ ID NO: 2, however, the different diseases or disorders of the inventions have different etiologies and are therefore distinct inventions, and therefore different considerations for enablement.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter or classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
